Summary

Systems engineer and hands-on infrastructure owner. Led NOC operations and engineering escalations at Front Range Internet and own deployment, hardening and recovery for Technomancy IT clients. I use coding agents to ship software and keep release checks, access decisions and incident recovery under human control.

Skills

- AWS and Azure · Linux and Bash
- Docker, Kubernetes, VMware ESXi and Hyper-V
- Git-tagged delivery, service-health and restore checks
- Access reviews, MFA, TLS and network segmentation
- Incident escalation, audit evidence and operator tooling

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Own AWS and Azure client delivery, on-call support and recovery.
- Build Git-tagged container releases and test PostgreSQL backup restores.
- Build access-controlled connectors; keep agent work separate from release checks.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Led NOC operations and took engineering escalations for hosting and colocation customers. Built diagnostics and operating tools for NOC staff.
- Migrated workloads from Hyper-V and VMware ESXi to Docker and Kubernetes. Worked extensively with AWS and completed smaller server and firewall upgrades.
- Ran SOC 1 and SOC 2 audits and translated control requirements into evidence and operating procedures.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Built a Linux routing system with per-office VLANs, bandwidth settings and Wi-Fi identity mapping. Automated firewall and router setup with Node.js.
- Built a front-desk tool for Wi-Fi password resets and troubleshooting.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

• Supported client networks and endpoints through monitoring, antivirus and on-call response.

Infrastructure and Systems Focal

IBM

2010 - 2012

• Automated backup, audit and compliance workflows and managed virtualization test labs and hosted desktops.

• Built an internal backup tool to reduce licensing costs; wrote Perl, Bash, VBA and PHP.

Selected Projects

Release and recovery automation

Technomancy IT · own practice

• Tagged releases from Git and checked container health and the public endpoint separately.

• Built backup verification that restores PostgreSQL into a disposable instance and checks the tables.

Tenant boundaries without manual router changes

Office Evolution · employment

2014 - 2015

• Built a Linux-based routing system that maps individual Wi-Fi accounts to the correct office VLAN and keeps bandwidth and access configurable for each tenant.

Education

Front Range Community College

Computer Science coursework

2011 - 2013

Certifications and Training

CompTIA Network+ | CompTIA | Earned
